

Business/Leadership

“The most cogent message about leadership that I've ever had the privilege to read.”

-Steve L. Evans, Vice President of Sales – Public Sector/Central U.S.
Sr. State Executive – IBM Florida

“The difference between ordinary leadership and extraordinary leadership is just a little ‘extra.’ **Fail-Safe Leadership** shows us that little extra. It is a ‘must read’ for anyone who wants to have a clear vision of leadership in their organization.”

-Dr. Ivan Misner, Founder & CEO, BNI,
Author of Masters of Networking

“Not only a well-timed book, but a welcome message, as well! Leadership development has long been in need of a major overhaul, and here it is...finally!”

-Edward J. McDevitt, COO, Easton Hospital

“Powerful! I can't imagine anyone truly interested in what's best for his or her organization *not* reading this book!”

-Domenic M. Carabello, President & CEO Florida Tax Watch

“It seems that over the years, every time I think I've found something new about leadership, it ends up being the same old wine put in a new bottle, so to speak. This message is remarkably and refreshingly new and different, and has direct application to my company.”

-Gary Hamilton, President, Everson Electric Company

“My measure of an excellent business book is one that makes me think about a common subject in an entirely new way, thereby opening up creative and powerful options for solving a problem—in this case, the leadership challenges I have in my department. By that yardstick, this book is a clear and definite winner!”

-Maureen M. Williams, Manager, System Operations, Nicor Gas
